LABEL: Planet Noise
STYLE: Electronica, Breakbeat, Techno
ORIGIN: Norway

BERMUDA TRIANGLE

Bermuda Triangle consists Jan-Tore Diesen, DJ Nils Noa and DJ Ariane. Jan-Tore Diesen is a renowned producer. DJ Ariane is one of Scandinavia's leading female DJ's and has spun in all of Oslo's major clubs. DJ Nils Noa is by many regarded as Norway's most talented young DJ's. He spins a lush mixture of house and breakbeats. He also compiled and mixed and this years "Prima Norsk 2" on Beatservice Records. DJ Nils Noa was also invited, as the first Norwegian DJ ever, to do an "Essential Mix" on BBC Radio One in England spring 2003.

Electronica makes up the basis of Bermuda Triangle's music, but it is complimented by acoustic elements like drums, flutes, bass, harp and vocals, both pop and opera. The group's first single "Mooger Fooger" appeared on John Digweeds CD mix "MMII" and the Hed Kandi release "Acid Lounge-In Space". Their second single "Tay Do 22" is featured on the new James Zabiela compilation "Sound In Motion" out this summer. The next single, "This is just (another song)", a vocal, dubby song, will be released later this fall. Bermuda Triangles album has got elements of trip hop, electronica, breakbeat, techno and even easy listening. Enjoy !

- "Mooger Fooger" by Bermuda Triangle is up next with clattering drums meeting an outer space melody, with delicate computerized vocal samples in the backdrop. An instant classic !! (Robbie Y-Resident Advisor.com reviewing MMII).

- Some of you have probably heard "Bermuda Triangle - Mooger Fooger" wich made it to John Digweed's MMII album last year. "Tay Do 22" is the Norwegian trio's followup, and it is even better ! It has a lot faster bpm, but the genre is still chilly breaks. OMG I love it, best tune I've heard so far this year." (Tranceaddict.com).

- "Tay Do 22" is one of the highlight tracks of the album, this is Bermuda Triangle at their best. (Robbie Y - Resident Advisor reviews James Zabiela's "Sound in Motion").
